

# Are you feeling sad or down lately?

Have you ever had a heart problem that you were hospitalized for?

*We are conducting a research study to learn more about how to help people after a sudden-onset heart problem*

## You may be eligible if you:

- Are between the ages of 18 - 85
- Often feel sad or down
- Have been hospitalized for a sudden heart problem, such as a heart attack

## Participation Involves:

- A one-time survey about your mood and health
- A one-time interview about changes after a cardiac event and the types of help you would like
- Interviews can be done in a group or individually, in person or by phone
- \$30 compensation
