A place for YOU to be included!

# Welcome to **HOPE WITH HEART**

*A place for YOU to be YOU!*

For over 30 years, Hope With Heart has been providing children with moderate to severe congenital heart disease a unique opportunity to have fun. Our week-long summer camp in beautiful upstate New York is *free of charge* for children ages seven to seventeen. Campers gain self-confidence in our warm and friendly setting. Parents experience peace of mind knowing their child's needs are being met. We can't wait for you to join our Hope With Heart family!

*A place to FEEL SAFE!*

Our pediatric cardiologist and cardiac care nurses work behind the scenes to keep our campers safe. One Camp Director, two Activity Coordinators and our squad of Camp Counselors bring the fun to life. Talk with our pediatric cardiologist to learn how your concerns are our concerns. The more we learn about your child, the more your child will benefit from Hope With Heart.

*I can't thank you all enough for the nice card you sent to Justin for his birthday! It really brought a smile to his face.*

—Denise G., Parent

*A place to HAVE FUN!*

Every day of camp finds our campers engaged in activities thoughtfully planned just for them. They swim in an olympic size swimming pool and if they can't swim, we help them learn. Quiet activities like movie night, campfires and cabin time are balanced with modified sports activities, arts and crafts, and tons of giggling games. And because this is camp after all, daily clean-up chores are shared by everyone.

Hope With Heart was founded on the truth that kids really just want to have fun. Rather than cancel camp during the Covid-summer of 2020, we organized our first virtual camp experience and made the astonishing discovery that **camp can be anywhere as long as we are together!**
